

## General

Z10 is a compact high level protection control panel for residential homes and other places where no space for traditional solution. The Z10 is designed to be easy used and its modular concept allows expansion up to 26 zones Trough E10 and labour-saving to installers. The Z10 could be connected directly to home and building automation control with external LAN board(HSL) for remote monitoring and control.

## 70% + compact<sup>1</sup>

The new generation of compact burglar alarm control panel against traditional system, keeping numerous features and more in only 4 din rail housing

## 28mA current consumption

We've reached the most important energy saving for alarm control panel with the best performance

## Built-in Switching power supply

Z10 belongs to high efficiency switching power supply series that can supply energy to accurately distribution on devices

## User friendly program

You can program the control panel, preferences and test simply using one touch EcZ10 software downloading from website

## Technical Characteristics

Maximun zones	35	Power supply	4-16V 100÷230V
Partitions	3	Current consumption	28mA
Events buffer*	128 records	Max output current	1.2A
Connection	RS 485	Balancing	10KΩ
