900142 **Z10** 9 zones 4 din rail control panel

Z10 is a compact high level protection control panel for residential homes and other places where no space for traditional solution. The Z10 is designed to be easy used and its modular concept allows expansion up to 35 zones Trough E10 and labour-saving to installers. The Z10 could be connected directly to home and building automation control with external LAN board (HSL) for remote monitoring and control.

Maximun zones	35	Power supply	4-16V 100÷230V
Partitions	3	Current consumption	28mA
Events buffer*	128 records	Max output current	1.2A
Connection	RS 485	Balancing	10KΩ

* Infinity buffer on mail using HSL board

28mA

+ efficiency²

900155 **B12 Li** 12V Li-ion battery on 4 din rail

It's more than traditional battery, it's a battery with monitor level! More B12 can be parallels even with different technology as Pb, NiMH, Li-ion to increase cpacity. Discharge control always up to a single cell.

Need more power? Ask to B12!

Nominal voltage	11.5V	Cells no.	3
Tipical voltage	12.6V	Energy test	✓
Capacity	2Ah	Long parking stand by	✓
Discharge current	800mA	Error signaling	10

Li-ion cells

Keystone
lock

900160 **INS** Transponder reader on keystone jack

ARM/DISARM board has 3 different leds signaling for total ARM, partition, alarm event. Common bus communication on building automation. Acoustic buzzer. Maximun compatibility with Keystone lock for free application.

Connection	RS 485
keystone jack	RJ 45

3x 
transponder

900161 **KEY** transponder key

RFID key	
Frequency tag	13.56 MHz

1x 
Protection +poles

900164 **PRT** Positive poles distributor with resettable fuse

Protected distributor DC powered zones or digital signal as RS 485. Up to tree 12V power lines can be protected from short circuit. Each line has a red led to indicate where short is. Usable on 12V , 24V or 27V.

PROMOTION

² refer on normal Pb battery

Accessories

900094

HSL High speed link

Remote control board

HSL (High Speed Link) allows remote control using a smartphone, tablet or PC, without any APP! SSL connection is guaranteed vs cloud.

900124

Sirander Selfpowered batteryless outdoor siren

The first outdoor siren designed to be installed once and maintenance free for 10 years lifetime and more! No more battery to change. No more dangerous substances to dispose. Thanks to patented self powered technology, the outdoor SIRANDER could be install where climates condition are particularly cold!

900198

Touch-S Slim 3.5" touch display keyboard

Intuitive icon based interface with touch technology. High and low voltage are displayed as arming and disarming system, panic button, exclusion zones and partition selectable, all this in one touch! Firmware upgradable, and home automation command extender included. Small size 2.4mm thickness and wall-mount installation only. Low power, only 40mA

900205

HiCon Remote control for third parts control panel

Thanks to simple connection with any brand control panel this board established remote connection for AirVoice applications and three output command relays with no customer software input. The board has 4 different input to check burglar alarm status, arm and disarm, power supply and others. After installation, only one registration on web site, and the board is ready to use by webApp!

service

With HSL or HiCon products you can use AirVoice service and will be always connected with your systems to any places. NO call dialer need! All web cloud solution in your hands and continuous monitoring automatic. From one alarm event starts multitasking call.

Cloud service included

If you buy 900094 HSL board for remote control
